Because of their unusual beauty and lasting qualities, many species orchids have proved themselves admirable as cut flowers. Their unique appearance appeals to discriminating people. The large flowered kinds such as Odontoglossum grande, Lycaste skinneri, Lycaste aromatica and Barkeria spectabilis make up into striking corsages while the spray orchids such as the Oncidiums provide interesting corsage backgrounds, dainty hair ornaments and graceful table decorations. These species serve well and long in the home since the blooms last for weeks as cut flowers and even for months when brought into the house on the plant.
